What is a correct syntax to create a Pandas Series from a Python list?

- ○ pd.createSeries(mylist)

- ○ pd.getSeries(mylist)

- ○ pd.Series(mylist)

What is a correct syntax to return the first value of a Pandas Series?

○ get(myseries, 0)

○ myseries.get(0)

○ myseries[0]

What is a correct syntax to add the lables "x", "y", and "z" to a Pandas Series?

○ pd.Series(mylist, lables = ["x", "y", "z"])

○ pd.Series(mylist, index = ["x", "y", "z"])

○ pd.Series(mylist, names = ["x", "y", "z"])
What is a correct syntax to create a Pandas DataFrame?

- ⚪ pd.DataFrame(data)

- ⚪ pd.dataframe(data)

- ⚪ pd.df(data)

What is a correct syntax to return the first row in a Pandas DataFrame?

- ○ df.get(0)

- ○ df.loc[0]

- ○ df[0]

What is a correct syntax to return both the first row and the second row in a Pandas DataFrame?

- df.loc[[0-1]]

- df.loc[[0, 1]]

- df.[[0-1]]

- df.[[0, 1]]

What is the correct Pandas function for loading CSV files into a DataFrame?

- ○ read_csv()
- ○ read_file()
- ○ ReadFile()
- ○ ReadCSV()

What is a correct syntax to return the first 20 rows of a DataFrame?

- ○ df.top(20)
- ○ df.start(20)
- ○ df.head(20)
- ○ df.row(20)

What is a correct syntax to return the entire DataFrame

○ df.Full()

○ df.to_string()

○ df.print_full()

○ df.dump()

What is the correct Pandas function for loading JSON files into a DataFrame?

○ read_json()

○ read_file()

○ ReadFile()

○ ReadJSON()

What is a correct syntax to load a Python Dictionary called "data" into a Pandas DataFrame?

- pd.ReadJSON(data)

- pd.DataFrame(data)

- pd.load_json(data)

What does the Pandas `head()` method do?

○ Returns the headers and the specified number of rows, starting from the top

○ Returns the specified number of rows, starting from the top

○ Returns the headers
